Control and manage with ease.

Bitlogix introduces NetControl 1.0 AV Equipment Control Software

Dallas, Texas, USA, January 5, 2004 - Available now! NetControl™ 1.0 Advanced Package is a software tool for audiovisual applications to assist in controlling and maintaining projectors and plasma displays over an ordinary TCP/IP network.

You can track audiovisual devices on a network using NetControl™ along with TCP/IP network interfaces like the EIKI NPC-1 or SHARP AN-LS1.

A powerful user software interface gives you important information about your AV devices. Many useful control functions are provided through the database driven control manager, event manager, status report manager and the anti-theft control.

Enjoy the freedom of easy AV device control through a TCP/IP network. Bitlogix™ NetControl™ is designed for university campuses, government facilities, rental applications or medium to large sized companies with multi-floor and even multi-building presentation applications.

NetControl™ 1.0 Advanced Package gives you the ability to do remote maintenance from your computer without actually seeing the AV device. It is designed to run in 24/7 applications. The unique design of the NetControl™ software allows you to control your equipment from another building, town, country, or continent.

NetControl™ 1.0 is designed for use with Microsoft® Windows® 2000 and Microsoft® Windows® XP.

Bitlogix Corporation, based in Frisco, Texas develops and markets network management software for audio visual equipment to assist in controlling and maintaining projectors and flat panel displays over a LAN/WAN. Bitlogix's products are designed for the educational, government and corporate market to reduce operating costs and to improve equipment ROI.
