Bitlogix NetControl ® manages Mitsubishi projectors

New NetControl software update supports the Mitsubishi projector line-up

Dallas, Texas, USA, June 23, 2004 – The new NetControl® software update includes support for over 28 different Mitsubishi projectors models. NetControl is a software application for audiovisual equipment to assist in controlling and maintaining projectors and LCD monitors over an ordinary TCP/IP network.

With its latest software update NetControl® 1.5 supports many additional LCD/DLP projectors including 28 different Mitsubishi models. All NetControl® control tasks, such as event scheduling, anti-theft control, status reporting, E-mail notification and main projector control, are compatible with all supported Mitsubishi projectors with no additional programming required. The new update is a free update for registered users of the NetControl® Advanced Package.

The NetControl® 1.5 software gives you the ability to do remote maintenance of audiovisual equipment over a TCP/IP network without actually seeing the AV equipment. It is designed to run in 24/7 applications. NetControl® is compatible for use with Microsoft® Windows® 2000 and Microsoft® Windows® XP.

Bitlogix Corporation, based in Frisco, Texas develops and markets network management software for audio visual equipment to assist in controlling and maintaining projectors and flat panel displays over a LAN/WAN. Bitlogix's products are designed for the educational, government and corporate market to reduce operating costs and to

improve equipment ROI. For additional information please visit
