Easy media control of AV equipment over the LAN/WAN

Bitlogix™ NetControl® Starter software 1.5 supports EIKI NPC-1 interface and over seventy EIKI projector models

Dallas, Texas, USA, February 23, 2005 – Bitlogix Software LLC announces a new version of the Bitlogix™ NetControl® Starter software. The 1.5 software version supports the EIKI NPC-1 TCP/IP network interface and over seventy different EIKI projector models. The new software allows users to control EIKI projectors over a LAN/WAN connection. Basic control features, such as power on/off, change inputs, lens focus and zoom, volume control, are included in the software. NetControl Starter was designed to meet the growing need for easy-to-use network control software for audiovisual equipment. The software is available at no charge to registered NetControl Starter Package users and can be downloaded from the **www.bitlogix.com** website.

If users need more control and reporting features for their audiovisual equipment the use of the NetControl® Advanced software is suggested. NetControl® Advanced is a software based media control system for central control and maintenance of AV equipment over the LAN/WAN. The integrated Anti-Theft-Control and the Event Scheduler help audiovisual departments from churches and universities to corporations keep full control over their equipment. Reading projector lamp life, power control, input selection, temperature control and signal detection are just a view examples of NetControl's feature-rich status reporting tools. NetControl® Advanced supports over 300 projector models of various brand names. NetControl® is compatible

for use with Microsoft® Windows® 2000 and Microsoft® Windows®
XP.

NetControl® Advanced and NetControl® Starter can be used at the
same time over the network to control and maintain projector
equipment.

Bitlogix Corporation, based in Frisco, Texas develops and markets
network management software for audio visual equipment to assist in
controlling and maintaining projectors and flat panel displays over a
LAN/WAN. Bitlogix's products are designed for the educational,
government and corporate market to reduce operating costs and to
improve equipment ROI. For additional information please visit
