Bitlogix® Starts Free Online Web Seminar Service

A new Bitlogix® online training service gives customers and clients easy access to NetControl® product presentations and training seminars.

Dallas, Texas, USA, August 31, 2005 – Bitlogix Software LLC, a worldwide pioneer in advanced projector control software, provides access to the first online web seminar service for NetControl® products on their company website www.bitlogix.com. Clients and users of NetControl projector control software can easily learn how to setup, use, and maintain the software efficiently. The online seminars also teach the correct setup of various hardware components such as network projectors from Hitachi, Epson, Sharp and device servers from Lantronix, Sharp, Eiki or Sena.

"Bitlogix is committed to educating customers on projector control software in complex network environments." said Rhonda Castleberry, sales director of Bitlogix. "The free online seminars help to encourage clients to use new ways of controlling projectors over a network and to ensure the success of network control software for audio visual applications as a new standard."

The online seminars will be frequently updated to provide customers the latest in projector network training. It is also planned to publish web seminars for dealers and integrators in the future.

About NetControl®:

NetControl is a projector control software solution that enables users to control and manage projector equipment in TCP/IP-based networks over Ethernet or wireless network connections. The software includes powerful projector theft alert capabilities, room control, projector status reporting, e-mailing, event scheduling and many other controlling features. NetControl is designed for Windows 2000, Windows XP and Windows Server 2003 systems. No proprietary control hardware is required. The latest version of NetControl supports over 380 different projector models.

Bitlogix Corporation, based in Frisco, Texas develops and markets network management software for audio visual equipment to assist in controlling and maintaining projectors and flat panel displays over a LAN/WAN. Bitlogix's products are designed for the educational, government and corporate market to reduce operating costs and to improve equipment ROI.
