

Press Release

For immediate release

Bitlogix® is a Hitachi® Preferred Solution Provider

Hitachi Preferred Solution Program endorses Bitlogix® NetControl® software and includes Bitlogix to the Preferred Solution Provider Program campaign.

Dallas, Texas, USA, October 11, 2005 – Bitlogix Software LLC, an international software development company for advanced network projector control software, joins the Hitachi Preferred Solution Provider Program after an endorsement on the Hitachi America, Ltd. web site. The Preferred Solution Program gives Hitachi customers a first class choice of quality accessory products for Hitachi LCD and LCOS projectors. With the latest release of Bitlogix NetControl® projector control and management software Bitlogix supports 53 additional Hitachi projectors. All basic and advanced NetControl features, such as automated scheduled projector control, theft control, maintenance reporting, auto control and simultaneous multiple projector control can be used with Hitachi models.

NetControl offers full protocol support to Hitachi projectors with RS232 control ports in conjunction with an external Ethernet network interface. Hitachi projectors with built-in network interface capabilities can be used with NetControl instantly and do not require additional hardware. The NetControl user interface is very intuitive and extremely easy to use. This is an out of the box solution with no professional programming required.

Bitlogix is committed to support future Hitachi projector models and to give existing clients a solid software control platform for Hitachi

projectors. As a service to Hitachi projector owners Bitlogix publishes free web training seminars on their web site to demonstrate the use of NetControl in conjunction with Hitachi projectors.

About NetControl®:

NetControl is a cost effective projector control software solution that enables users to control and manage projector equipment in TCP/IP-based networks over Ethernet or wireless network connections. The software includes powerful projector theft alert capabilities, projector status reporting, e-mailing, event scheduling and many other controlling features. NetControl is designed for Windows 2000, Windows XP and Windows Server 2003 systems. No proprietary control hardware is required. The latest version of NetControl supports over 380 different projector models.

Bitlogix Corporation, based in Frisco, Texas develops and markets network management software for audio visual equipment to assist in controlling and maintaining projectors and flat panel displays over a LAN/WAN. Bitlogix's products are designed for the educational, government and corporate market to reduce operating costs and to improve equipment ROI.
