Bitlogix® extends technology partnership with Sun Microsystems

Technology partnership between Bitlogix and Sun Microsystems advances NetControl® technology and increases market penetration for software-based room control systems.

Dallas, Texas, USA, March 14, 2009 – Bitlogix Software LLC, a leading provider of software-based network control and management solutions for LCD and DLP projectors and flat panel displays, continues the partnership with Sun Microsystems and extends the collaboration to develop and improve Bitlogix's NetControl technology for future A/V applications. This announcement marks the second anniversary of the companies' partnership.

Sun's Partner Advantage Program for ISVs provides the resources that Bitlogix needs to meet the challenges of today's room control system market. As Sun's partner, Bitlogix gains possibilities to access extensive marketing and sales resources, and the ability to showcase the company and its NetControl solutions to customers in partner directories.

One of the main benefits of being a Sun Associate Partner is the official acknowledgment of the stability and robustness of Bitlogix's advanced projector control and management NetControl® technology on Sun hardware platforms.

“We are delighted to partner with Sun Microsystems and to receive the official acknowledgment of Bitlogix's robust expertise in control

and management applications for network projectors and flat panel displays confirmed by client satisfaction.” commented Mr. Robert Sterzing, President and CEO of Bitlogix Software LLC. “We are grateful for this opportunity and look forward to working with Sun technologies to provide better solutions to the ever growing market needs.”

Bitlogix Corporation, based in Frisco, Texas develops and markets network management software for audio visual equipment to assist in controlling and maintaining projectors and flat panel displays over a LAN/WAN. Bitlogix's products are designed for the educational, government and corporate market to reduce operating costs and to improve equipment ROI.
